

Nobuyoshi Shimmen

Engineer・PdM

Nobuyoshi Shimmen

PLAID, Inc. /PdM/Engineer
DEC 2025 - PRESENT, TOKYO

agito, Inc. /PdM/Tech Lead
SEPT 2018 - NOV 2025, TOKYO

Summary

Full-stack engineer and PdM with 10+ years of experience building ad-tech products from zero in startups. Takes ownership across the full product lifecycle — from customer discovery and planning to engineering and post-launch support — with business impact as the primary compass. Has served as Tech Lead for teams of 8–10 engineers and shipped multiple LLM-powered products end-to-end. Effective at bridging business strategy and technical execution.

Experience

PLAID, Inc. /PdM/Engineer
DEC 2025 - PRESENT, TOKYO

- Led a paid PoC for same-day ad data acquisition with a key client and PMM, validating T-1→same-day upgrade via event-driven pipeline. Confirmed for production rollout; evaluated by PMM as a future differentiator and currently being proposed to additional clients. (BigQuery, Looker Studio)
- Brought in by the internal ad agency team as a data engineer: built a BigQuery data mart and Looker Studio dashboards for a major retail client to address rising query costs, reducing BQ scan volume by 22.8%. (BigQuery, Looker Studio)
- Built an ad status anomaly detection system for the internal ad agency team: maintained a status management data mart via BigQuery Scripting and implemented scheduled monitoring with Google Apps Script to catch delivery failures and verify new ad visibility. Planned for PoC rollout to enterprise clients. (BigQuery, Google Apps Script)
- Organized 4 weekly claude.ai workshops for 4–5 non-engineer ad operations staff, providing hands-on support for automating recurring tasks such as weekly report creation.

agito, Inc. /PdM/Tech Lead
SEPT 2018 - NOV 2025, TOKYO

2024/10 - 2025/11

- Owned the full lifecycle of a new AI-powered advertising product as sole engineer and PdM — from client discovery (in partnership with sales) and planning through development, release, and support. Shipped a beta of an integrated platform featuring three tools:
(TypeScript, Node.js, Next.js, Cloud Run, PubSub, Memorystore, BigQuery, Vertex AI, Gemini API, OpenAI API)
 - Campaign Search (Semantic): Automated the manual process of finding similar past campaigns using BigQuery × Vertex AI vector search. Built from scratch — no prior search capability existed.
 - Campaign Simulation: Predicted performance for new campaigns based on historical data from similar campaigns, enabling data-driven decisions in sales and planning.
 - Creative Generation: Built a system to auto-generate ad banner images and copy from landing page URLs. Pivoted to generating optimized prompts for image generation AI after the release of gpt-image-1.

2023/01 – 2024/09 • PdM

- As PdM, defined and managed the product roadmap in collaboration with the CEO and PMM, keeping business strategy and development plans aligned.
(Team: 8–10 engineers, 1 PMM, 5–6 CS)
- Reduced report setup time from ~30 minutes to one click by building a Looker Studio Linking API integration using Google Apps Script. The mechanism was later adopted as a native feature in the core application by the engineering team. (Google Apps Script, Looker Studio Linking API)
- Joined onboarding sessions for enterprise clients as the technical representative, briefing their engineering teams on ad data schemas, ingestion schedules, and data mart usage.
- Shipped beta integrations for GA4, AppsFlyer, and Adjust using Google Apps Script to validate market demand with minimal engineering investment. Confirmed partial demand; decided against full integration given the projected ROI. The beta serves as a sales asset, giving the team a credible "we support these platforms" talking point in deals.
(Google Apps Script, BigQuery)
- Brought in by the internal ad agency team as a data engineer: built a KPI dashboard for a travel company's new website launch, serving as an embedded data engineer. Led BigQuery data modeling and Looker Studio dashboard implementation in collaboration with a PM and sales. (BigQuery, Looker Studio)

2018/09 - 2022/12 — Joined the PLAID Group in 2022/10

- As a founding engineer, developed the advertising reporting platform from the ground up alongside the CTO. (Team: 8–10 engineers, 0–1 designer, 1 PM/Sales)
- Scaled connected ad accounts from 3,000 to 20,000 and grew daily report volume to approx. 200,000/day by resolving scalability bottlenecks through BigQuery partition design and async processing optimization.

- Designed and executed GAE monolith→serverless migration (Cloud Run + PubSub async architecture), improving horizontal scalability and reducing operational overhead. (Go, PubSub, Cloud Run, Datastore, Memorystore, Cloud Scheduler, BigQuery, Cloud Storage)
- Built a data mart generator to link ad data with client budget and KPI data. (Go, PubSub, Cloud Run, Datastore, BigQuery, Cloud Storage)
- Developed a SQL generator for BI tools. (Go, Cloud Run, Cloud SQL)
- Built an Excel report generation system. (PHP, GCE, PubSub, Cloud SQL)
- Developed full-stack web applications. (JavaScript, Vue.js (Vuetify), PHP (Laravel), GCE, Cloud SQL)

ubun,inc. / Freelance Engineer

FEB 2021 - APR 2022, TOKYO

- Developed an application targeted for Amazon sellers. (Team: 2 engineers, 1 PM)
- Responsible for front-end, back-end, and batch processing as a full stack developer.

TVISION Insights Inc. / Freelance Engineer

JUN 2018 - AUG 2018, TOKYO

- Created an internal web application.
- Resourcefully and confidently managed time and projects independently.

Techloco, Inc. / Engineer

OCT 2015 - JUL 2018, TOKYO

- Collaborated in developing an all-in-one marketing tool. (Team: 2 engineers, 1 PM)
- Proposed and developed an application that allows users to review, comment on website designs on their browsers.

Soldout, Inc. / Marketing Division

APR 2014 - SEP 2015, TOKYO

- Developed Google Apps Scripts, using Salesforce API, and HubSpot API to improve business workflow.

Education

Aoyama University / Bachelor of Business Administration, BBA
APR 2010 - MAR 2014, TOKYO

The University of Vermont / Exchange Student
AUG 2012 - MAY 2013, BURLINGTON, VERMONT, USA

- 9 month long exchange program through International Partnership & Collaboration

Skills & Interests

Programming Languages

Go, TypeScript / JavaScript, PHP, SQL, HTML/CSS

Frameworks & Libraries: Next.js, Node.js, Vue.js (Vuetify), Laravel

Hobby: Dart, Python, Swift

Infrastructure

GCP: Cloud Run, GAE, GCE, BigQuery, Cloud SQL, Datastore,
Memorystore, PubSub, Cloud Scheduler, Cloud Storage, Vertex AI, Firebase

AWS: EC2, S3 · CI/CD: GitHub Actions, CircleCI, Docker, Git

Languages

Native Level: Japanese

Business Level: English (TOEIC score 960)

Interests and Hobbies

- Developing entrepreneurial side projects
- Running an independent side service
- Spending time with family
- Studying fitness and working out

Certificates

Udacity/Machine Learning Engineer Nanodegree
2016-2017

Udacity/iOS Engineer Nanodegree
2015
